Objective

Passionate Associate Software Engineer with 1.5 of year experience building web applications. Now looking for challenging career, to utilize my knowledge and skills so that I can contribute fully to the growth of organization, while working in an innovative and growth oriented environment.

Work Experience

Elena Geo Systems Pvt Ltd, Bengaluru

(May 2023 – Oct 2023)
Jr. Software Developer

- Worked on Elena Main Site (Company Website).
- Built Buoy Monitoring System web application to keep live track of 22 buoys based on light, location and battery.
- Integrated a React Leaflet map to visualize the real-time positions of the buoys on the map.
- Implemented Chart.js to display the overall status of all buoys and implemented a service worker for low battery notifications related to the buoys.
- Designed frontend code using HTML, CSS and JavaScript to create a responsive web application that works across desktops, tablets, and mobile devices.
- Collaborated with the development team to troubleshoot and resolve frontend issues, ensuring a smooth and user-friendly online experience.
- Rewrote HTML to comply with organization and industry standards for accessibility and SEO.
- Worked with RESTful APIs to integrate backend functionality into the frontend.
- Built a stable and maintainable codebase using React JS.

Infynow Software Solutions LLP, Belagavi

(Nov 2021 – Nov 2022)
Associate Software Engineer

- Collaborated on the development of client and company projects, focusing on the implementation of modern web technologies.
- Implemented designs using HTML, CSS, Bootstrap, JavaScript, and React.js to create visually appealing and responsive user interfaces.
- Designed and developed compatible web screens for both mobile browsers and desktop/laptop screens.
- Have worked with web debugging tools (Chrome Developer Console).
- Conducted performance optimization to enhance the speed and efficiency of web applications.
- Performed bug fixes and code reviews.
- Conducted thorough cross-browser compatibility testing, ensuring seamless functionality across various browsers and devices.

Skills

- HTML
- CSS
- JavaScript
- Bootstrap
- Tailwind CSS
- React JS
- Redux
- JSON
- **Git** and **GitHub**

Personal Projects

Expense Tracker

github.com/KaveriPatil03/expense-tracker.git

- Built a speech recognition-based expense tracker using React and Speechly API.
- Created a visual dashboard using ChartJS to perform the analytics and display the transactions.
- Implemented ContextAPI and localStorage to store and keep track of the transactions.
- Deployed the application in GitHub.
